### Annex 1.2 Specification Cockpit ergonomics

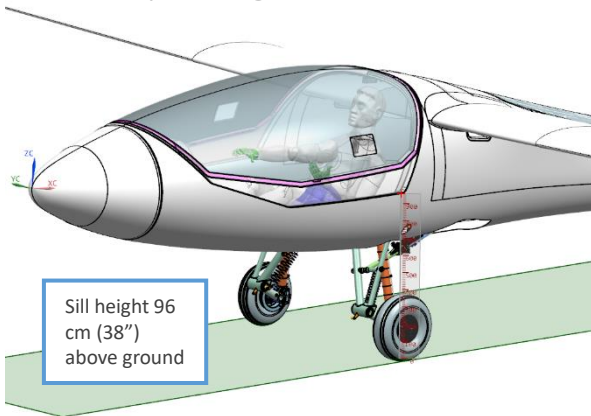

#### Cockpit ergonomics

The cockpit is designed to meet the requirements of high performance sportive cross-country and competition soaring on one hand and those of comfortable leisure and travelling flights on the other hand.

It fits for 1.60 m (5'3") to 2.00 m (6'7"). Check your position by help of the scale inside the picture below.

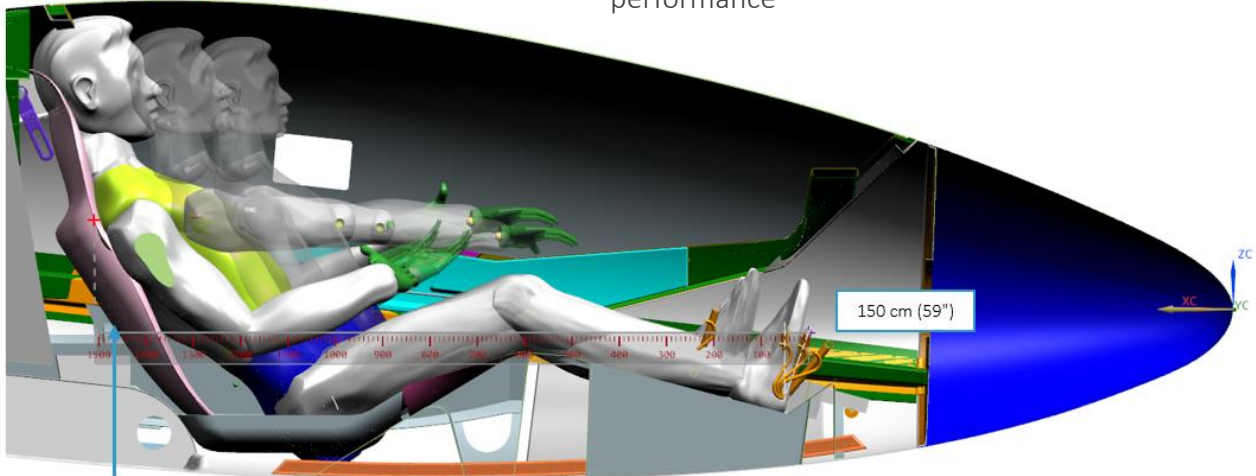

Features:

- Adjustable seats fitting a wide range of pilots without additional cushions
- Optional space for parachute in backrest
- Low sill height of only 96 cm (38") for easy entry
- Perfect ergonomics and comfort for long flights translates to more concentration, more safety, more performance

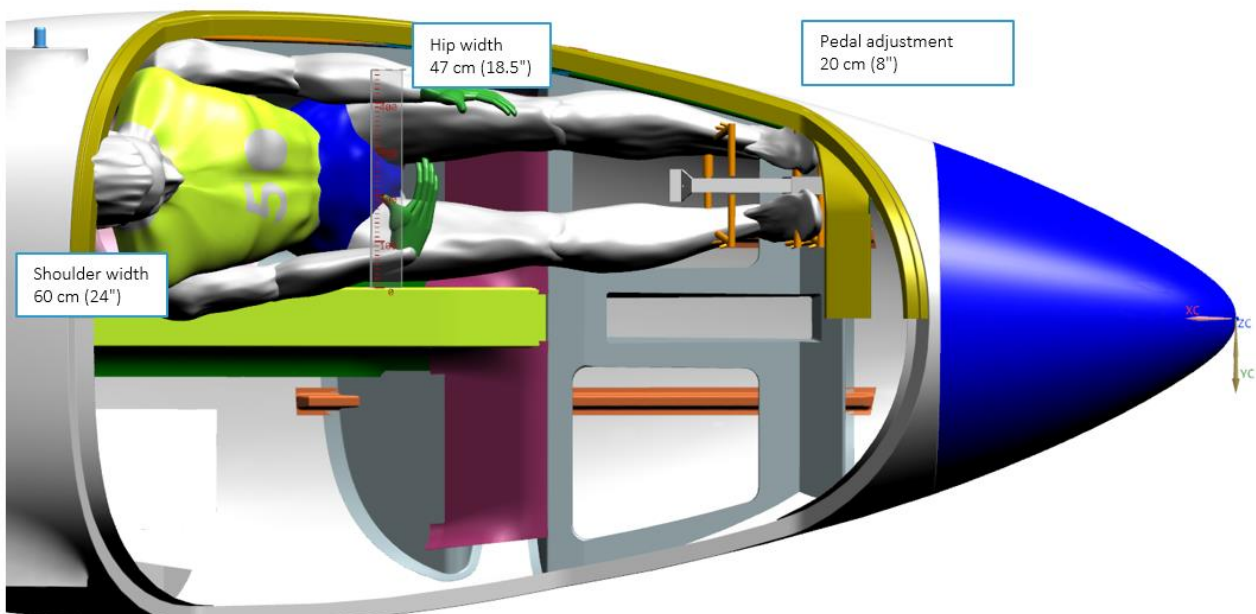

2.0 m (6'7")

1.6 m (5'3")

Space for personal chute

Shoulder width 60 cm (24")

Hip width 47 cm (18.5")

Pedal adjustment 20 cm (8")
